

Title:

SPECIAL SESSION: A Gender-Informed Approach to Nursing Research

Keywords:

Gender Identity, Inclusion and Research

Description/Overview:

This session aims to provide nurse researchers with foundational knowledge to take a gender-informed approach to nursing research by being inclusive of all gender identities, from research proposal and demographics questionnaires, to the purpose of the research and dissemination of the results. Inclusivity of all genders can advance nursing research, education, and practice by guiding the development of knowledge and interventions to reduce disparities among all gender identities.
