Learning Objectives

- ◆ Overview of nurses' changing role in and expectations for role in patient engagement experience
- ◆ Recognition of need to develop an innovative curriculum aimed at forming skills to implement patient engagement and to incorporate health information technology in engagement
- ◆ Awareness of curriculum created to
 - ◆ increase exposure to state-of-the-art engagement techniques
 - ◆ build interdisciplinary relationships that support patient-centered care and culture change
 - ◆ acquire knowledge and skills to effectively lead engagement and healthcare design initiatives

Background

- ◆ Individuals have greater access to their health data than ever before
- ◆ Individuals are increasingly generating their own health data
- ◆ Online tools make accurate health information more accessible
- ◆ Apps and websites could enable individuals to directly participate in self-management
- ◆ U.S. Department of Health and Human Services 2017 directive

Community-Academic Partnership

- ◆ Patient Centered Outcomes Research Institute (PCORI) supported community-academic partnership addressing adolescent healthcare transition in an underserved community
- ◆ Partnership among patient-advocacy organization, school of nursing, and pediatric hospital
- ◆ Addressing:
 - ◆ Independence
 - ◆ Transition
 - ◆ Research

Concept

- ◆ Clinicians educated, trained, and socialized to be care providers not partners
- ◆ Need to manage engaged care process including assessing patient engagement capacity, exchanging information, and intervening
- ◆ Nurses have formidable direct and indirect influence on patient engagement
 - ◆ Often first point of care and organization transformation leaders

Patient Engagement

- ◆ Requires processes, structures, and relationships
- ◆ Strengthen individual's ability to:
 - ◆ make informed healthcare decisions
 - ◆ weigh costs and benefits of how to reach optimal health
- ◆ Hopefully improve quality of life

Determining Needs

- ◆ Building upon patient and family suggestions, conducted assessment of PhD curriculum for:
 - ◆ Patient centeredness and patient engagement awareness
 - ◆ Health information technology
- ◆ Determined need for patient engagement and technology seminar
 - ◆ create an innovative curriculum aimed at developing a new generation of nurse scientists
 - ◆ skills to implement patient engagement
 - ◆ incorporate health information technology as part of their methodology

Designing Curriculum

- ◆ Subject matter experts
- ◆ Literature review to identify relevant interdisciplinary engagement themes
- ◆ Incorporate technology examples
- ◆ Review, present, and emulate state-of the art engagement techniques and case studies
- ◆ Design evaluation tools

Teaching Strategies

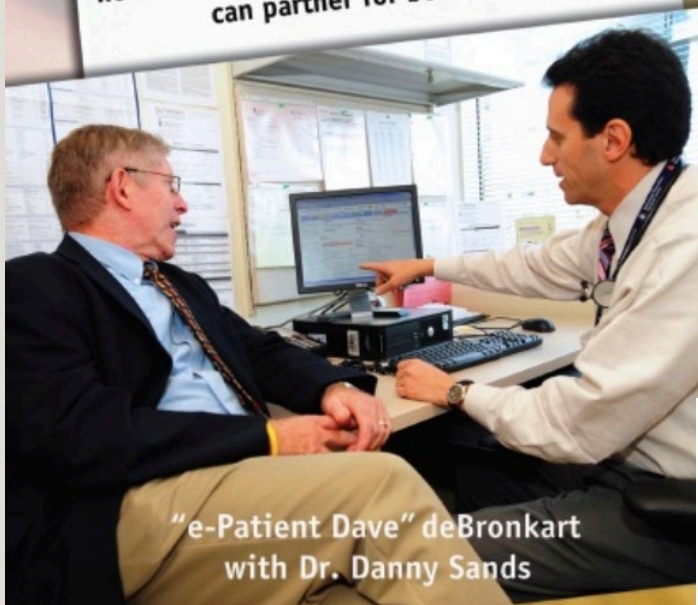

- ◆ Readings
 - ◆ Evaluation of methodology
- ◆ Presentations/Lectures
- ◆ Videos
- ◆ Case studies
- ◆ Student designed solutions
- ◆ *Patient presentations*

Let Patients Help!

A "patient engagement" handbook –
how doctors, nurses, patients and caregivers
can partner for better care

"e-Patient Dave" deBronkart
with Dr. Danny Sands

INTRODUCTION BY ERIC J. TOPOL, M.D.

"I felt I was looking over Thomas Paine's shoulder"
– Elliott M. Stone

e-patients

how they can help us heal health care

Tom Ferguson, MD
and the e-Patient Scholars
Working Group

Themes Explored

- ◆ Age
- ◆ Language(s) Spoken
- ◆ Socioeconomic status
- ◆ Race/ethnicity
- ◆ Literacy: reading level, health knowledge, e-health
- ◆ Engagement measures
 - ◆ Engagement level
 - ◆ Evaluation of technology incorporation
- ◆ PCOR Research
- ◆ Validity of submitted data
- ◆ Immigration status
- ◆ Veteran status
- ◆ Urban/rural
- ◆ Inclusion in informatics design

Assessment

- ◆ In-class discussions
- ◆ Individual article presentation and guided discussion
- ◆ Project proposal addressing an element of patient engagement and patient-centered outcomes methodology applicable to their scholarly expertise or organizational need
- ◆ *Project evaluation of an informatics solution*

Outcomes

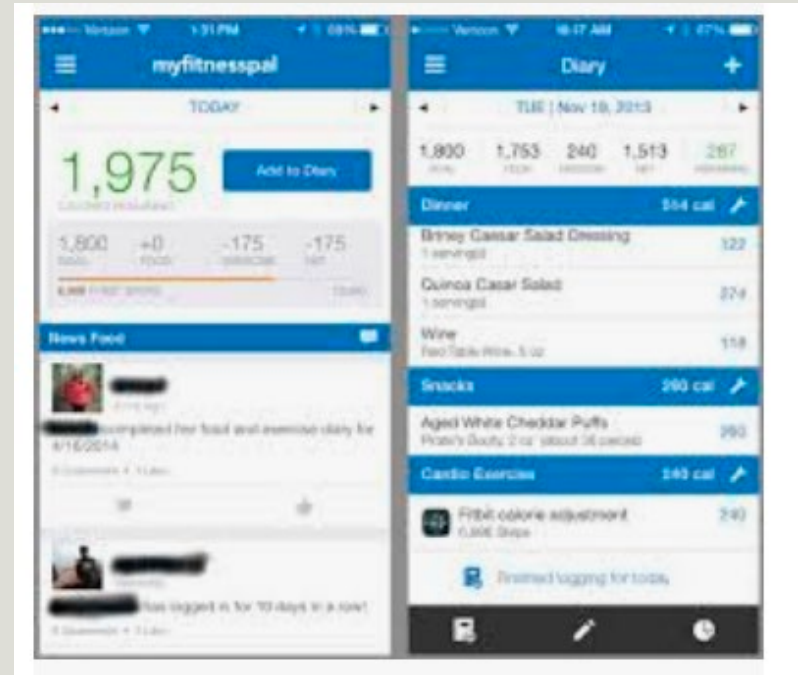

- ◆ Students critically explored patient engagement and patient activation from multiple stakeholder viewpoints
 - ◆ Health care provider
 - ◆ Family member
 - ◆ Patient
 - ◆ Other relevant stakeholders
- ◆ Analyzed and critiqued relevant research methodologies in patient engagement technology
 - ◆ Patient portals
 - ◆ Health monitoring applications
 - ◆ Social media
 - ◆ Other modalities

Additional Learnings

- ◆ Students also explored the role of technology including tracking devices, social media and other platforms as sociocultural factors shaping health behavior and patient engagement
- ◆ Incorporated international research and a myriad of cultural approaches to engagement
 - ◆ Students had practical tools applicable within a variety of cultural environments

Results

- ◆ More familiar with concurrent and related growth of patient centered outcomes research and proliferation of health – related technology
 - ◆ EHR
 - ◆ Portal
 - ◆ e-PROMS
 - ◆ Personalized health data trackers
 - ◆ Computer/telephone applications

Student Feedback

- ◆ Reported high levels of acceptance
- ◆ Noted multiple ways in which course influenced clinical practice and research goals
- ◆ Participants suggested restructuring of class elements
 - ◆ Order of the themes
 - ◆ Incorporate patient or caregiver speakers
 - ◆ Study more technologies/mobile apps

Conclusion

- ◆ Students felt curriculum was sufficiently broad and had provided needed exposure to patient engagement theory as well as practical examples of patient engagement
- ◆ Further expansion of future seminars would invite patient or caregiver speakers to discuss their own experiences

Thank you!
