

Learning Activity:

LEARNING OBJECTIVES	EXPANDED CONTENT OUTLINE
Participants will be able to describe the integration of SBIRT into an undergraduate nursing program.	Participants will be provided information about Screening, Brief Intervention, and Referral to Treatment (SBIRT). The concepts of motivational interviewing will be reviewed. Specifics of the the 2 1/2 hour workshop with live standardized patients will be discussed.
Discuss the importance of SBIRT in the clinical setting to identify and provide early interventions to persons at risk for substance abuse.	The incidence and prevalence about substance abuse in US will be discussed. The importance of nursing in early identification and treatment for substance use disorders will be emphasized.
