

Learning Activity:

LEARNING OBJECTIVES	EXPANDED CONTENT OUTLINE
The learner will be able to describe differences between EMLA and LMX4 in managing pain associated with sharp wound debridement.	I. Literature review A. Studies supporting use of EMLA B. Studies supporting use of LMX4 C. Studies comparing EMLA and LMX4 D. Gaps in knowledge II. Results of randomized, controlled, cross-over study comparing EMLA and LMX4 for pain management during sharp debridement
The learner will be able to discuss clinical implications associated with using EMLA and LMX4 for managing pain during sharp wound debridement.	III Results IV Implications for practice
