# The global world emphasizes the Unity of Humankind

# IMOGENE KING

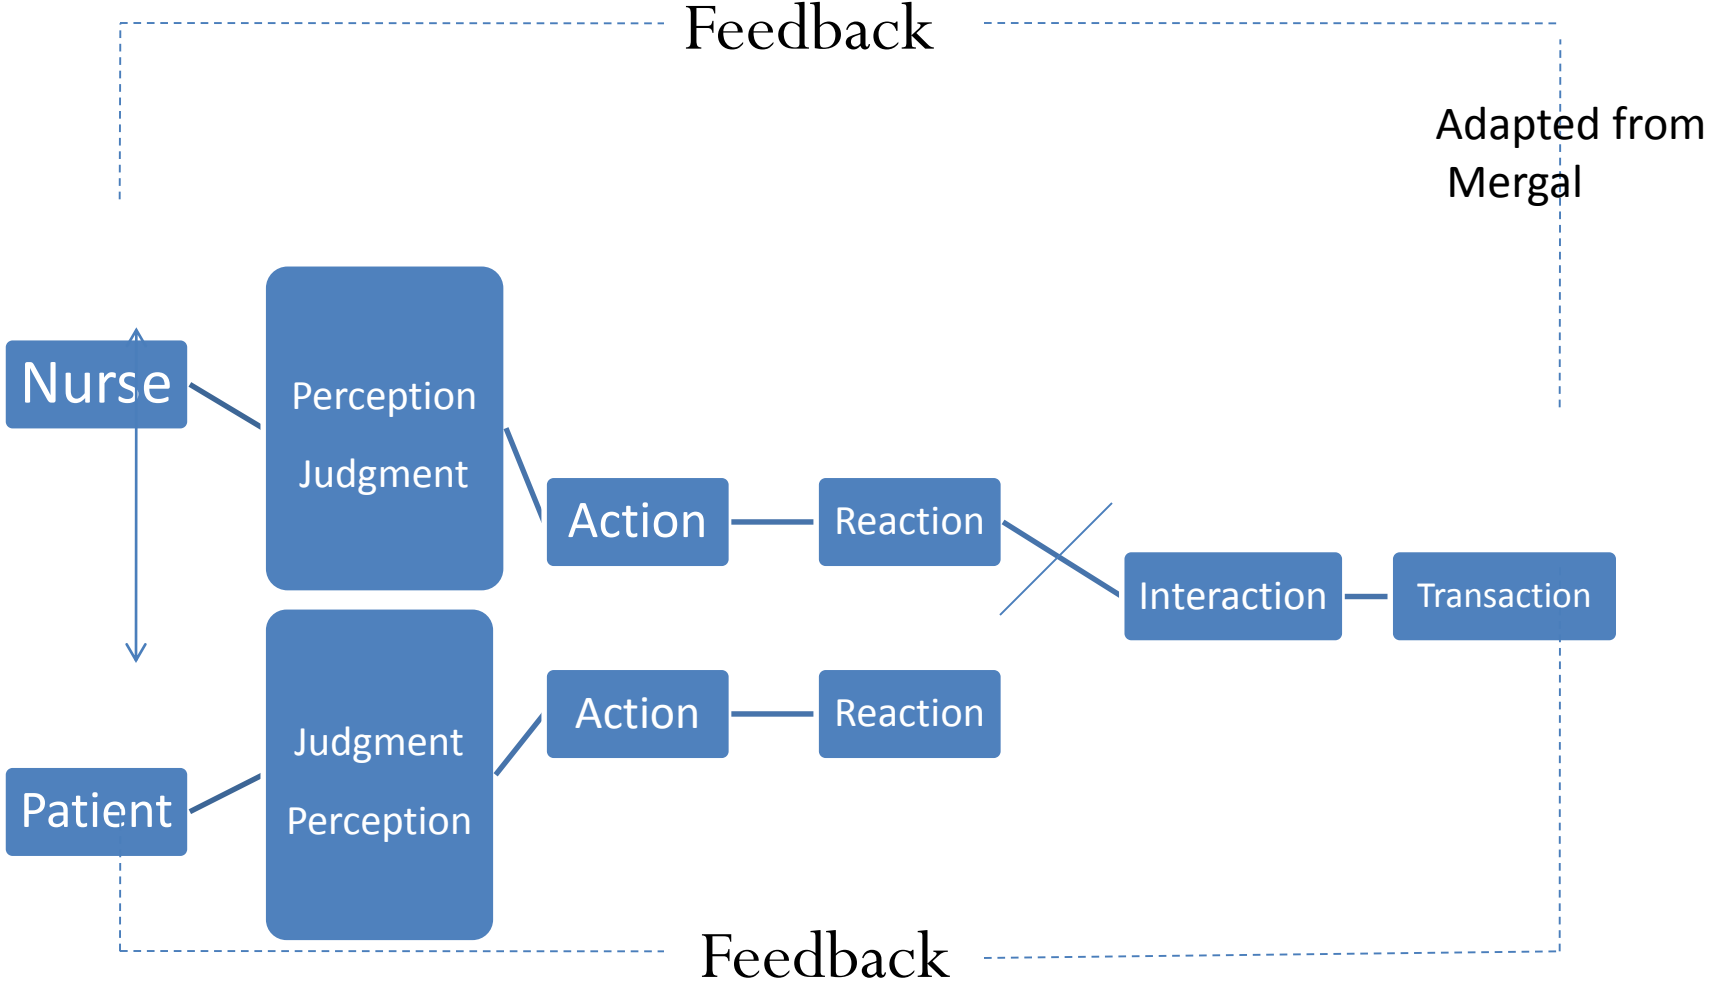

## Nursing Theorist in Focus

**Some slides from PPT by Amethyst Vic C. Mergal, RN (2009) accessed and adapted by BEVERLY J WHELTON, RN, MSN, PHD October 5, 2015**

<http://www.slideshare.net/macluvniam/dorothea-orem-imogene-king>

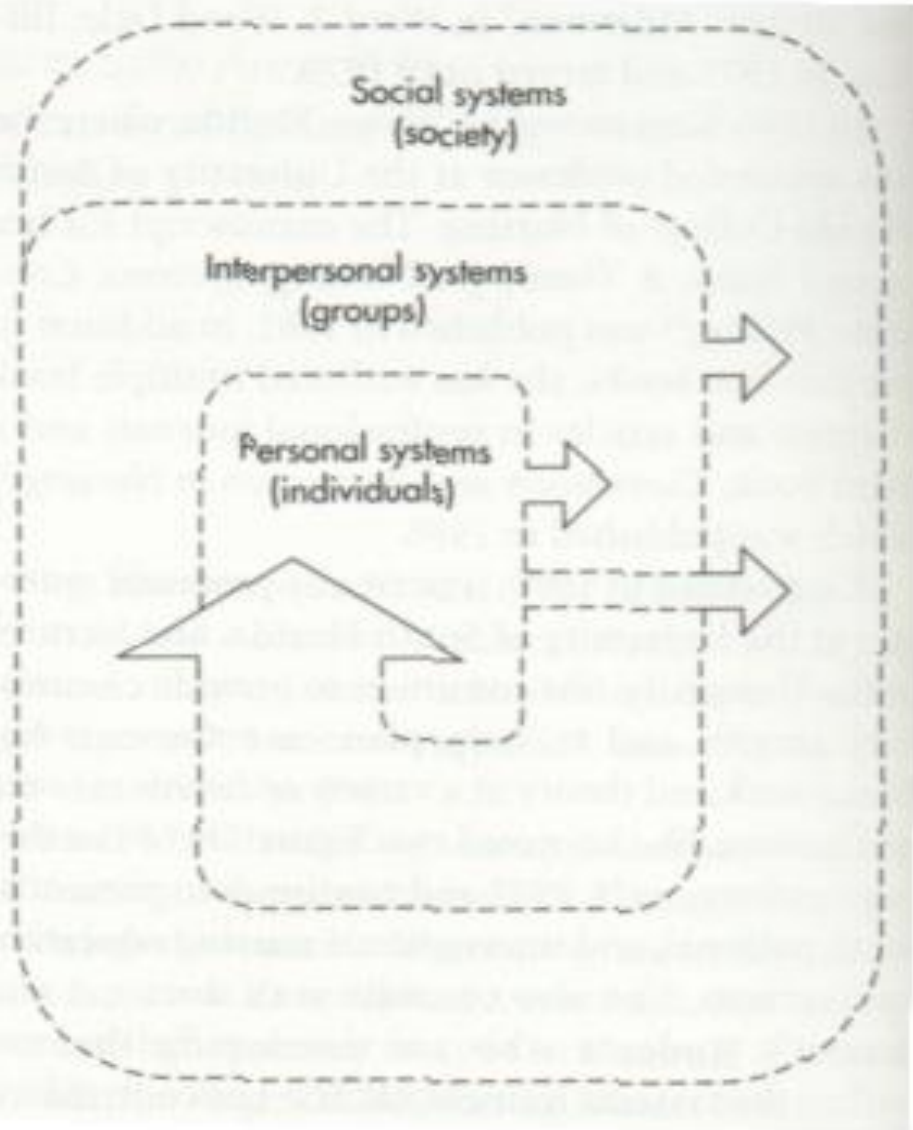

Through the Aristotelian Perspective of the human person in the work of Thomas Aquinas that King studied at St. Louis University, King viewed patients and nurses, all humans as substantial beings able to have an intellectual/ conceptual grasp of the world from experience. With concepts the intellect forms propositions and is able to come to new understandings. Aware of these capacities of knowledge and the capacity of choice that follows on knowledge, King (1971, 1981) saw that when patients become active participants in identifying needs and transacting health related goals they more actively chose to achieve these mutually set goals whose achievement becomes evidence for evidence-based practice.

# KING'S DIAGRAM OF INTERACTION

**A model of King's Theory of Mutual Goal setting**

# DYNAMIC INTERACTING SYSTEMS

Three systems in the conceptual framework:

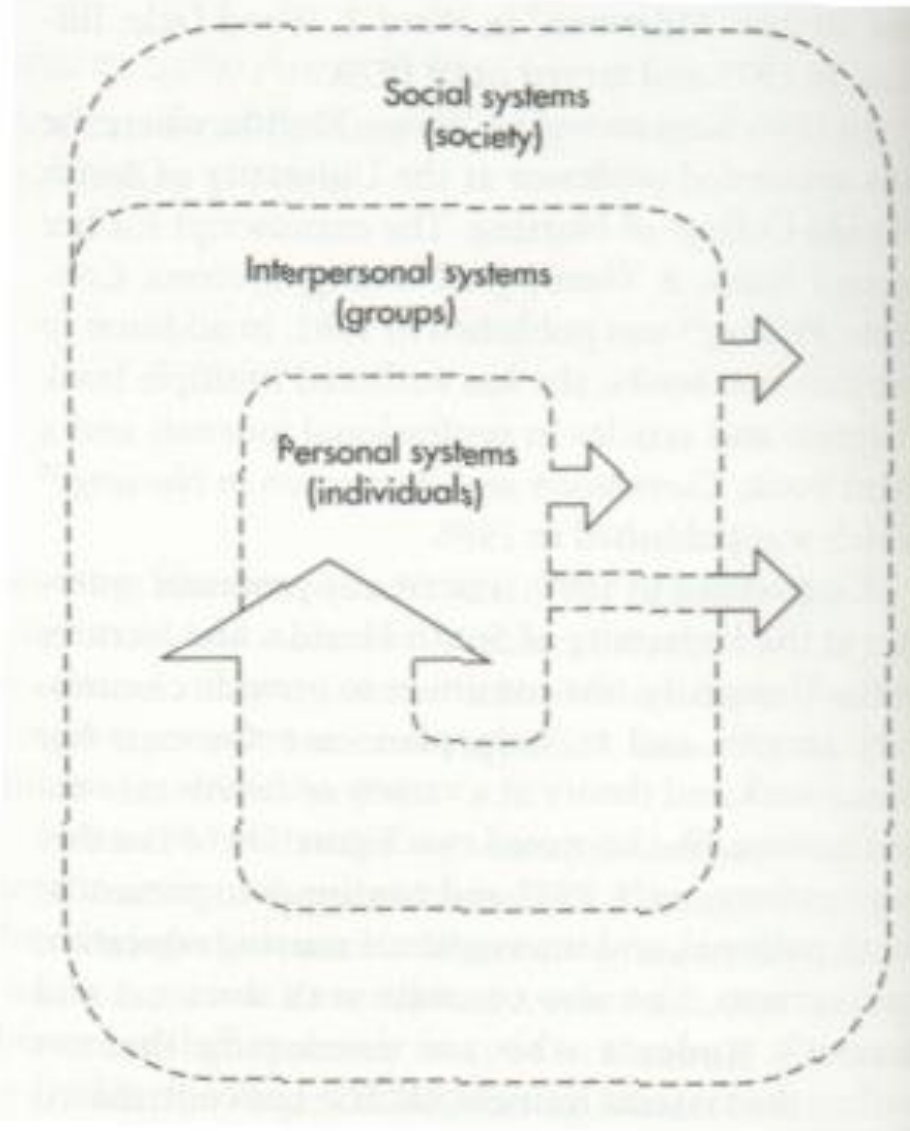

**Personal System** (the individual)

**Interpersonal Systems** (individuals interacting with one another)

**Social System** (groups of people in a community/society sharing common goals, interests, and values)

Study systems as a whole rather than as isolated parts of a system

# DYNAMIC INTERACTING SYSTEMS

## *Elements of each System*

- **Goal:** Health
- **Structure:** 3 open systems
- **Functions:** identified in the reciprocal relationships as they interact
- **Resources:** essential to keep systems in harmony
  - People & money
- **Decision making:** critical to perform functions and attain goals

# Personal System Concepts

- **Self**
  - awareness of being a person separate from others but related to others
- **Growth and Development**
- **Body Image**
  - personal & subjective; acquired or learned; dynamic and changing
  - includes how person sees self & other's reactions to one's appearance)
- **Space**
- **Time**
- **Learning** (1986, not defined)
- **Perception**

# Interpersonal System Concepts

Interaction

Communication

Transaction

Role and  
Stress

# Social System Concepts

- **Organization**

- formal or informal structure that orders positions and activities
- made up of persons with roles and positions to meet goals

- **Authority**

- regularity, direction and responsibility for actions

- **Power**

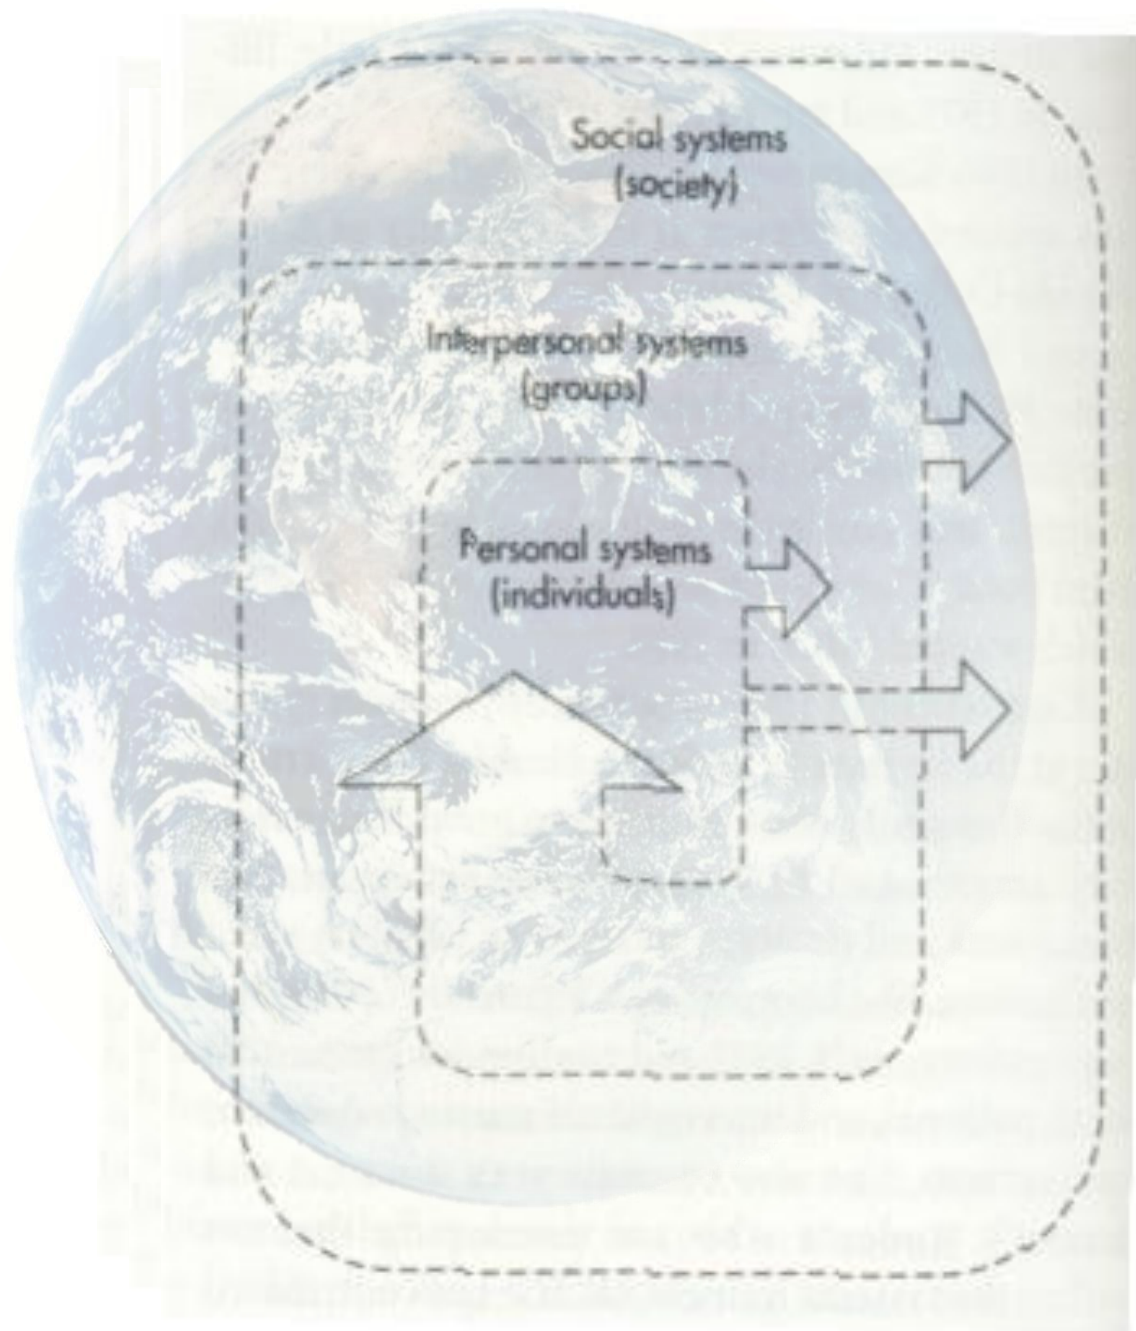

- energy necessary to avoid chaos in a society

- **Status**

- relationship of one's place in a group to others

- **Decision Making**

- changing and orderly process wherein choices are made in relation to goals

# The Global System

the fourth system  
for a world community

Concepts to be added  
beyond social system  
concepts:

Culture

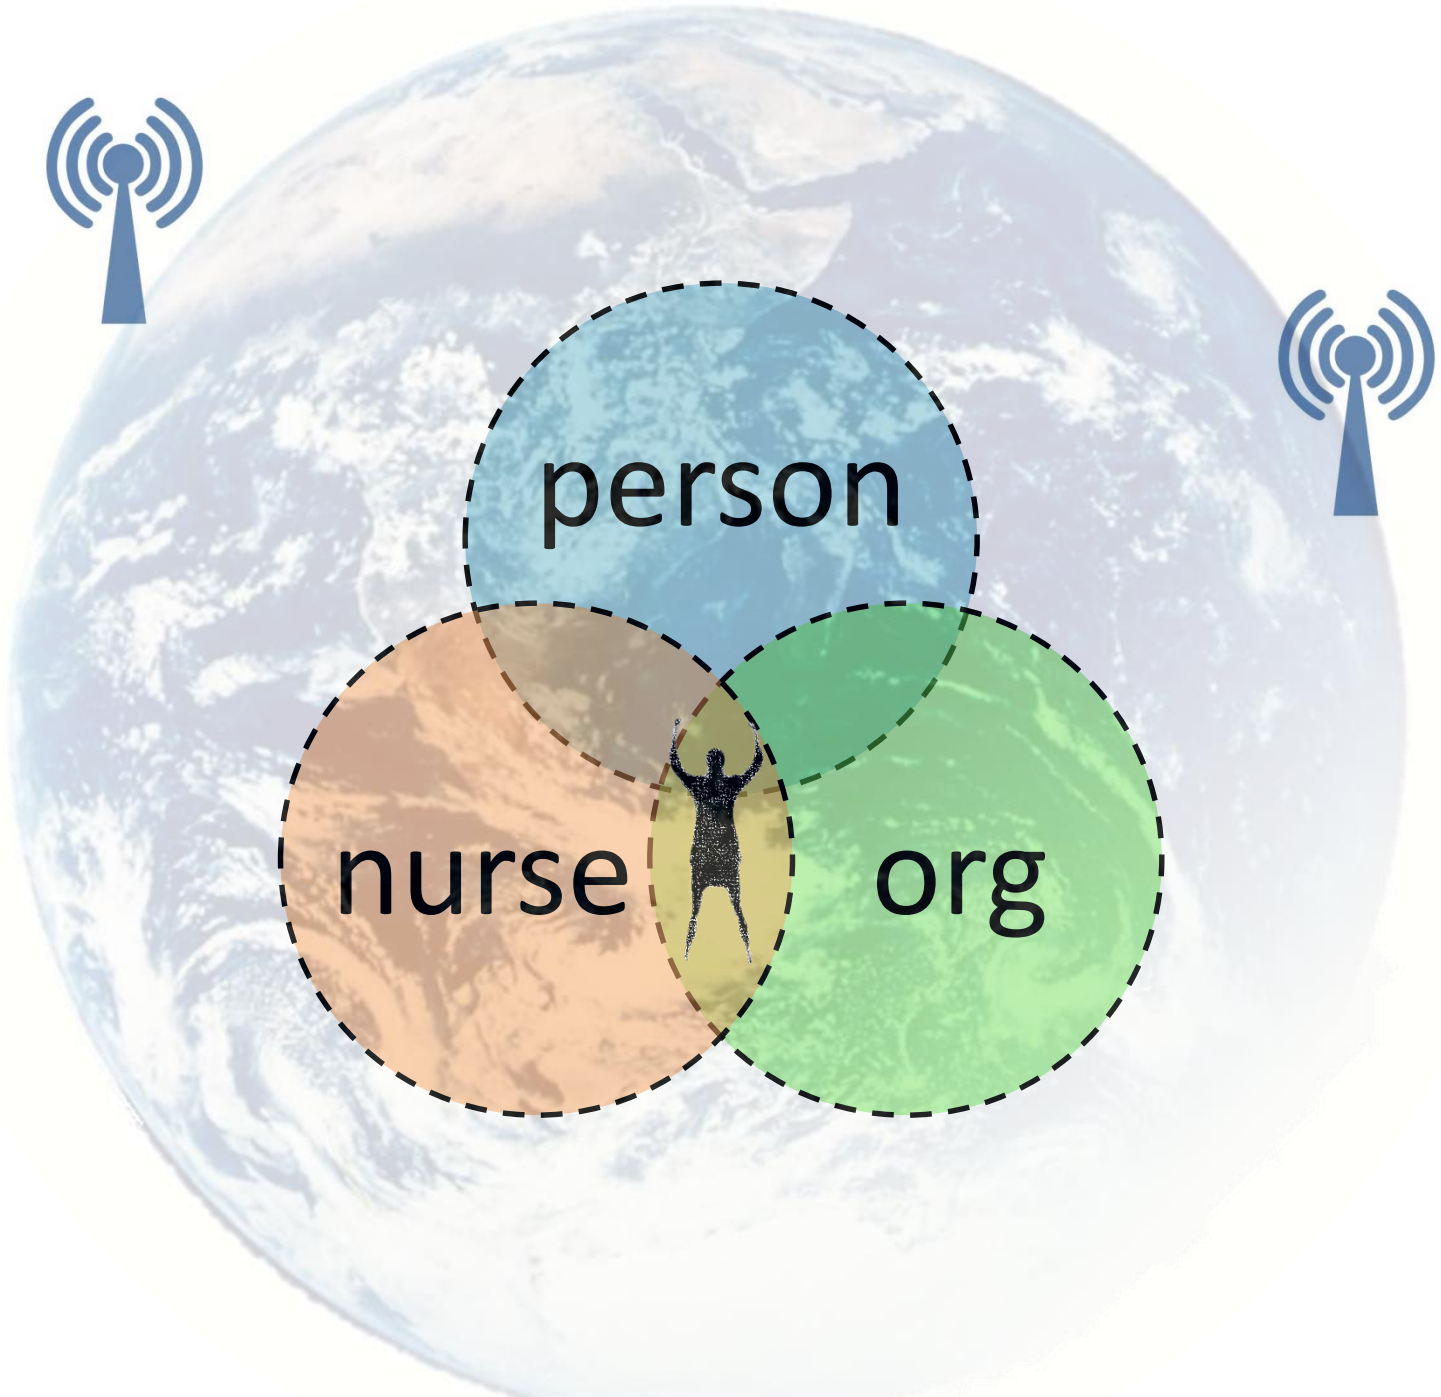

Environment

Technology available

Economic stability

Political stability

Safety

person

nurse

org
