# Expanding the Scope of Research Using Technology

Missi Stec, DNP, APRN, CNM, FACNM, FAAN SUNY Downstate College of Nursing

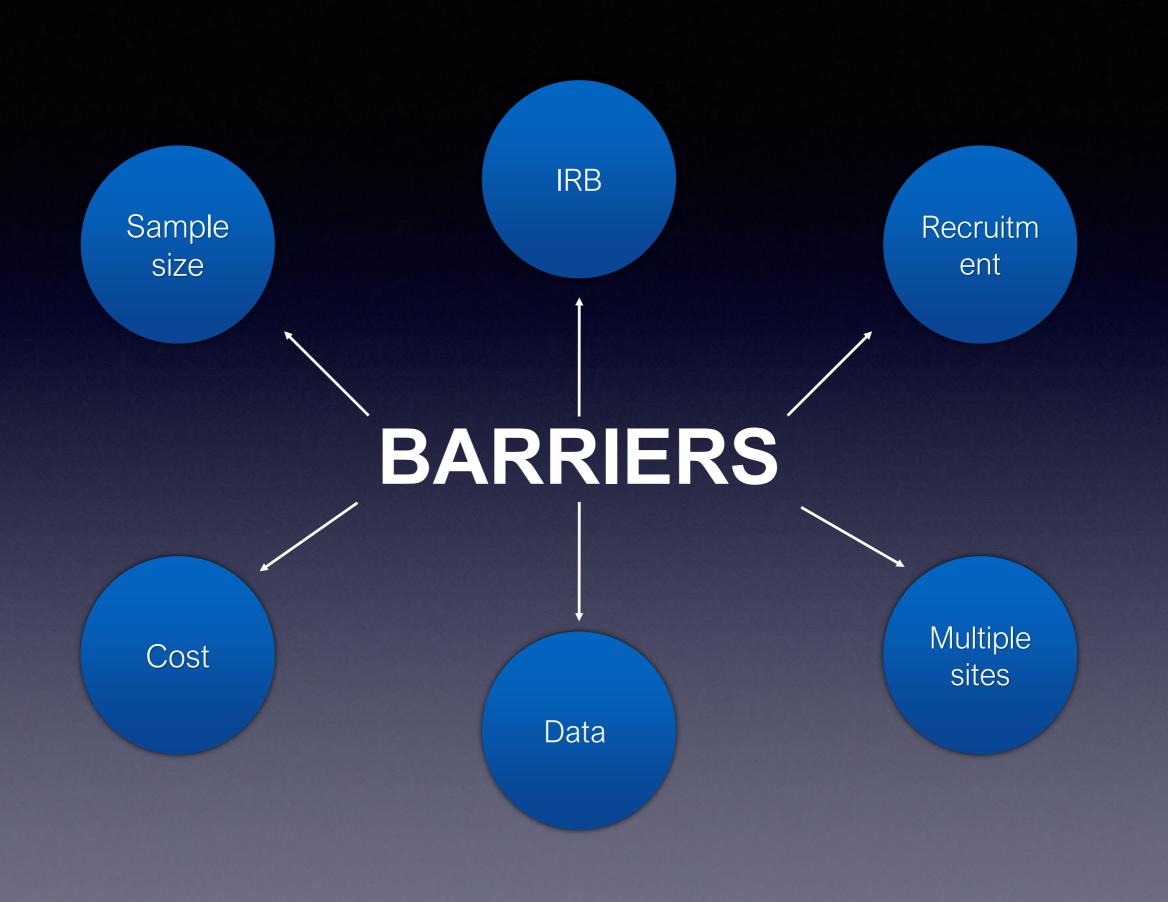

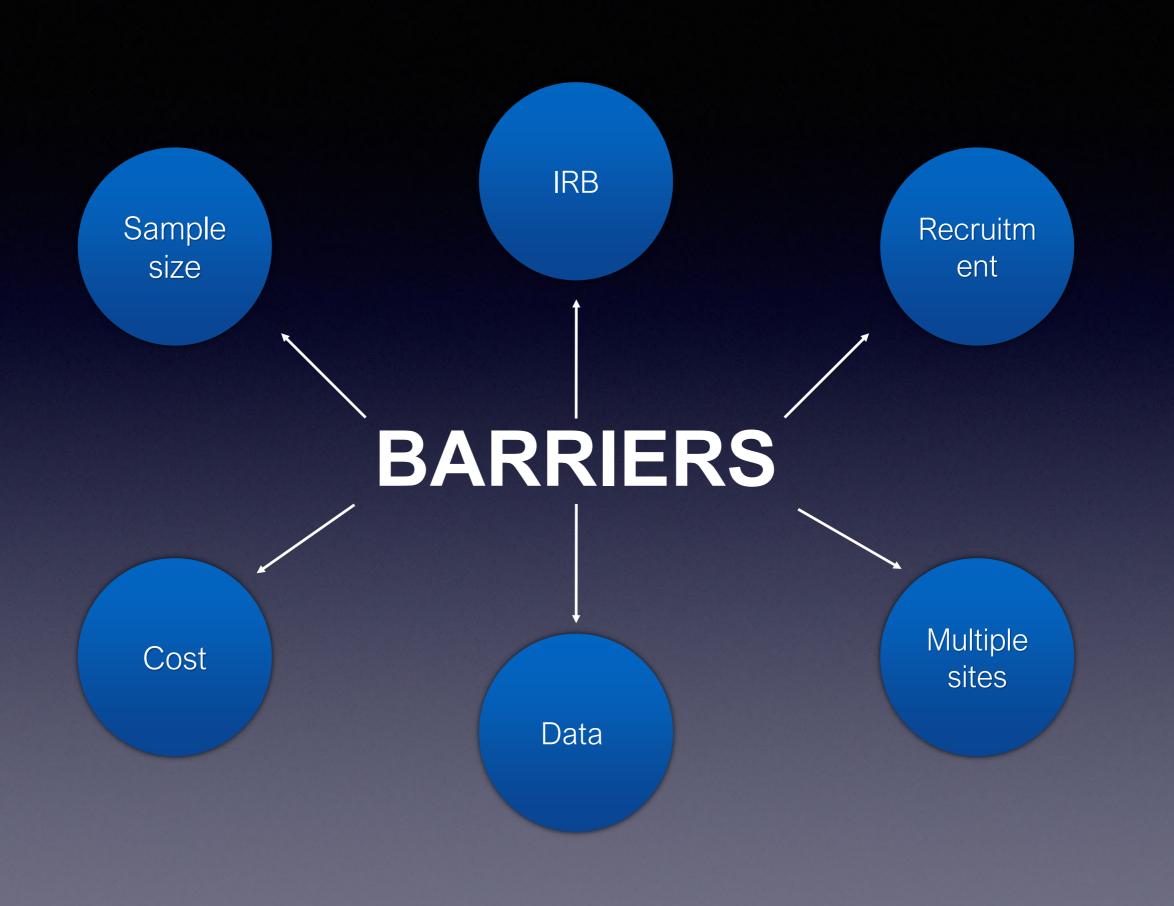

# Objectives

- Conceptualize ways to improve research using technology
- Evaluate apps that can be used in research implementation

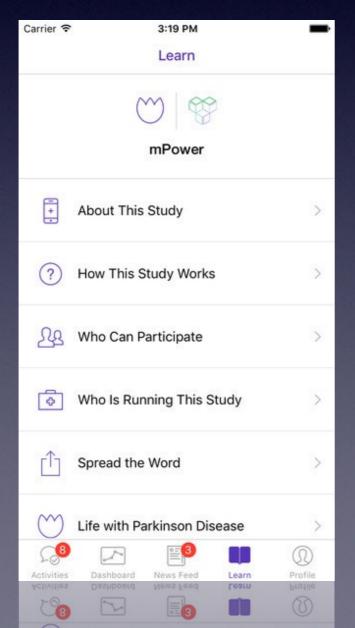

Research Kit iOS

ResearchStack Android

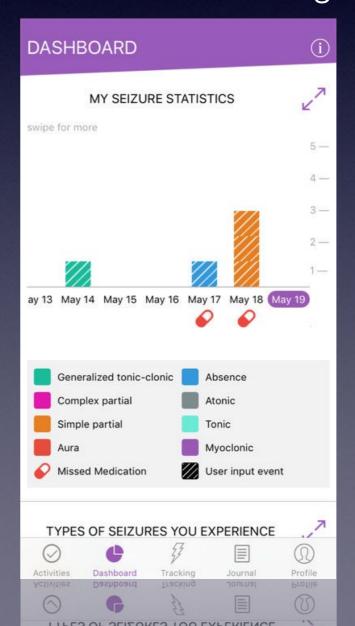

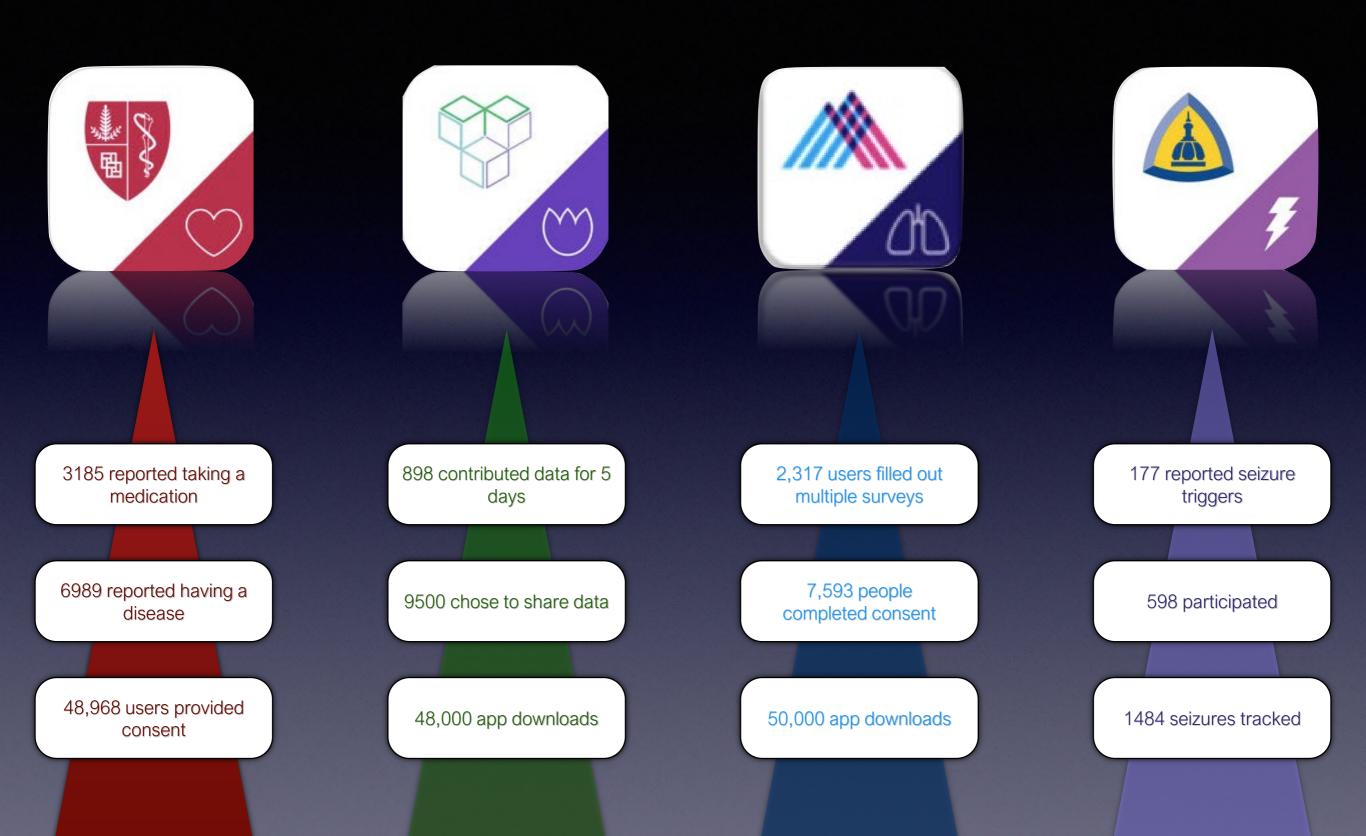

### mPower Parkinson's Disease

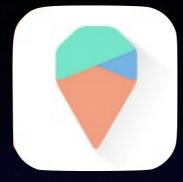

#### Epi Watch Seizure Monitoring

Multiple Sclerosis

Gait & Emotion

America Walks

Fever

Team Study Football Player Health

Sleep Health

Postpartum Depression

Peripheral Arterial Disease

Cognitive Function

6th Vital Sign

#### **SUCCESSES**

- Large enrollment numbers
- Large scale data
- Correlation of results with existing studies
- Ease of use for consent and data gathering

#### **CHALLENGES**

- Drop off in engagement over time
- Self report could be a validity threat
- Study follow up variance
- Physical activity measurement inaccuracies

## Potential options

- Communication with participants
- Interaction via social media sites
- Utilization of learning platforms
- Access to study resources

# Surveys

RedCap

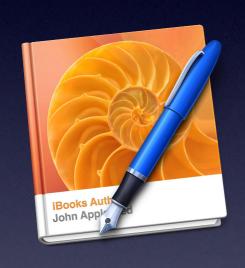

Google forms

Survey Gizmo

# Digital Content

Multitouch Books

iTunesU Or LMS

iMovie

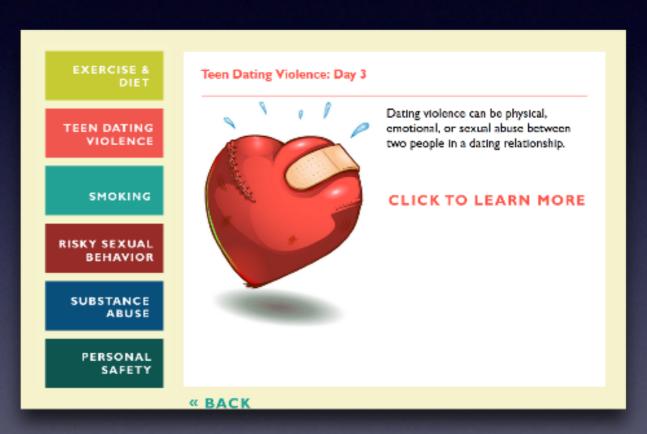

Podcast

## Face to Face Interventions

#### Web based interventions

## Questions

melissa.stec@downstate.edu
